

# ERAS | THE FUTURE IN FOCUS

## ERAS® Update at ARANS

**Richard Peng**  
ERAS Outreach and Engagement Manager

# Topics for Today

- ERAS Strategy and Outcomes
  - System update
  - Program signal update
- What's Coming for ERAS 2025
  - Fee Assistance and Pricing
  - MyERAS Application Updates
  - Thalamus Integration
- Preparing for the Next Season

# AAMC Initiatives Supporting the Academic Medicine Community

## Advocacy

- GME positions
- SCOTUS briefs
- Student Aid
- Pathway Programs
- DACA
- NIH funding

## Medical Education Initiatives

- Foundational Competencies for UME
- DEI Competencies
- QIPS Competencies
- Medical School Performance Evaluation
- Medical School Profile System

## Data, Reports & Publications

- *Academic Medicine* Journal
- MedEdPORTAL
- Curriculum Reports
- AAMC Resident Readiness Survey Project
- Graduation Questionnaire (GQ)
- Physician Specialty Data Report
- Report on Residents
- GME Track

## Constituent Affairs

- Group on Student Affairs
- Council of Faculty and Academic Societies
- Council of Teaching Hospitals
- Council of Deans
- Group on Resident Affairs

## Diversity in Medicine

- Summer Health Professions Education Program
- K-12 Educational Initiatives and Summit
- Pathway Programs and Outreach
- Disability in Medical Education
- Specialty-specific demographic reporting across continuum

## Student Resources & Programs

- Careers in Medicine (CiM)
- Residency Explorer
- FIRST (financial guidance)
- Virtual medical school & specialty fairs
- Organization of Resident Representatives
- Organization of Student Representatives

The ERAS program has made progress to increase transparency, improve the experience, and reduce fragmentation.

## Selection Tools

- New ERAS Application to Support Holistic Review.
- Improved PDWS.
- New Interview Management Platform.
- **Lower Costs.**

## Data Analytics

- Cerebellum for Institutions.
- School/Advisor Analytics.
- Residency Explorer tool.

## Thought Leadership & Research

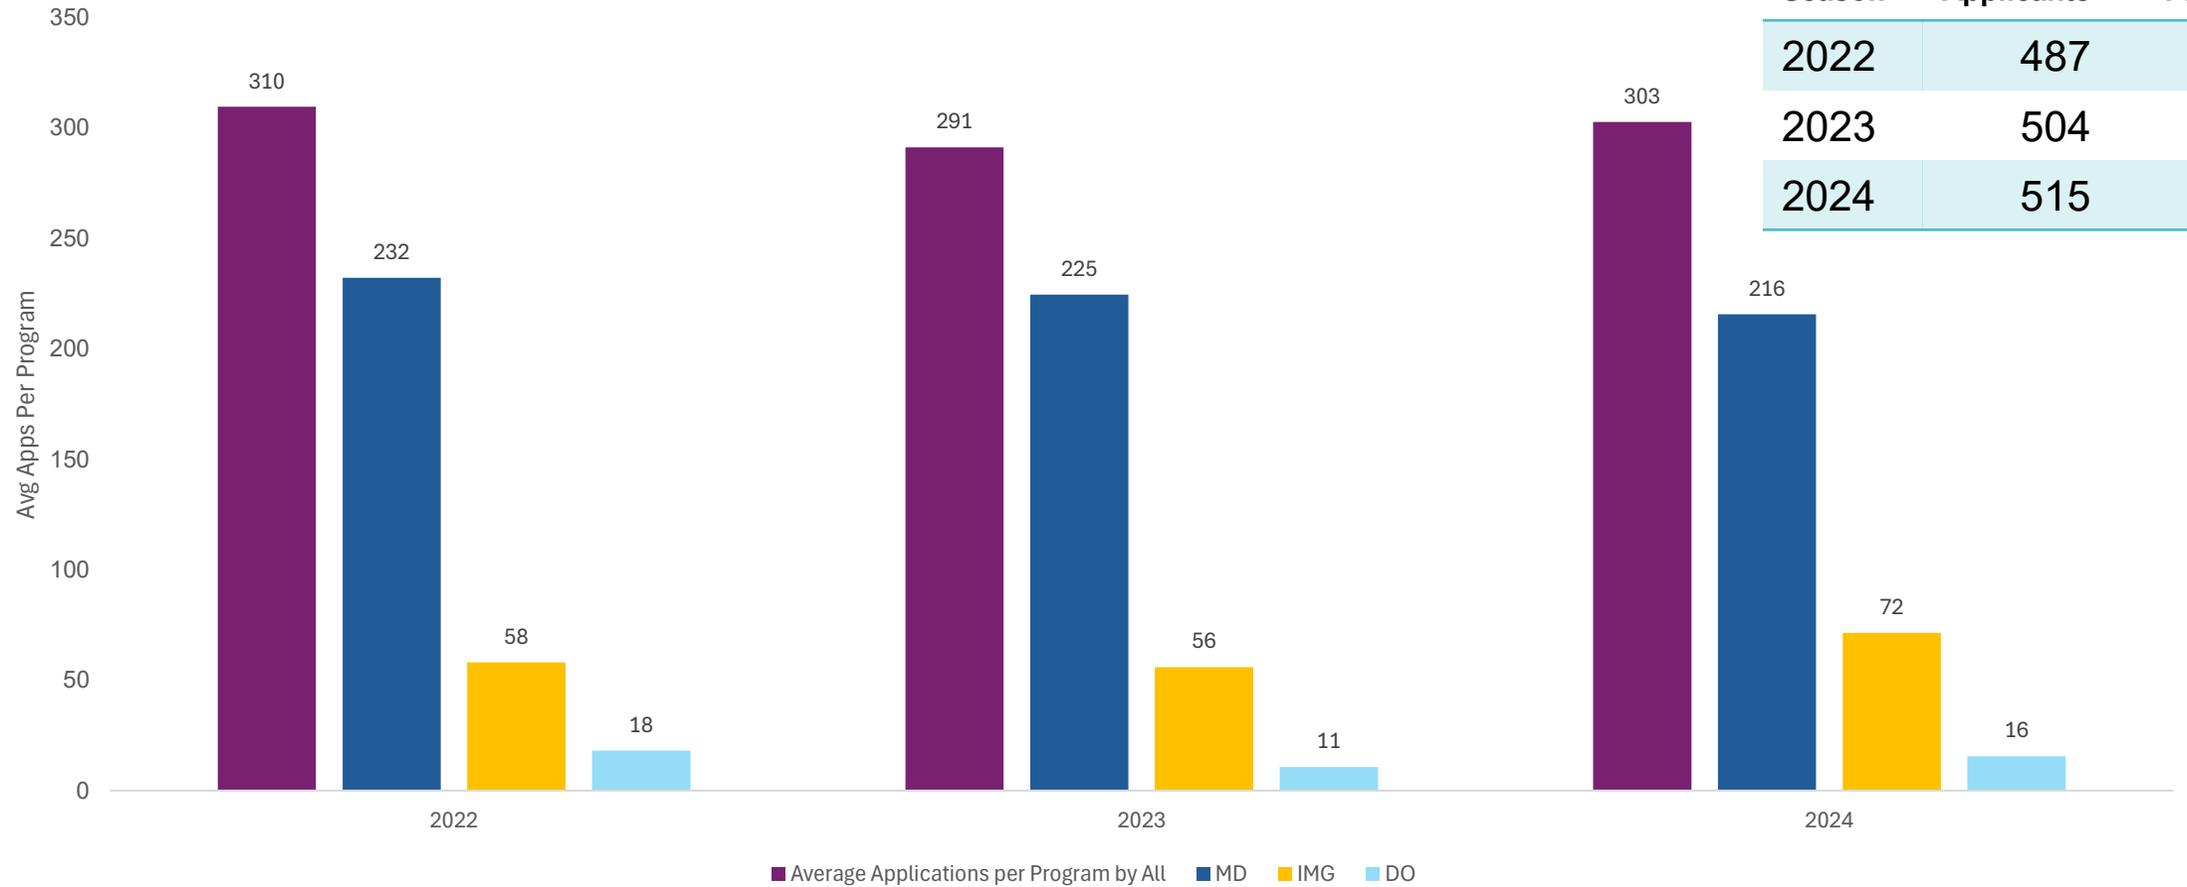

- Evaluation of New Content.
- Multi-organization Research Collaboration.
- Increased Engagement with Specialties and Programs.

# Our efforts have made a positive impact on the residency process

- **Improved system performance** - 99.5% uptime and no issues during critical events
- **Increased adoption of innovative tools** – more than 22 specialties are now using program signals
- **Fewer overall applications** – average applications decreased from 97 to 94 (from 70 to 64 for MD applicants) resulting in lower costs and reduced program burden
- **Reduced costs** - average applicant saved \$81

# Neurosurgery in the ERAS System

Average ERAS Neurological Surgery Applications per Program

Season	Applicants	Programs
2022	487	115
2023	504	115
2024	515	116

# Pros & Cons of Signal Approaches

## Small # of Signals

## Large # of Signals

## Two-Tier

### Pros

- True top programs.
- Guards against use of program signals as interview invitation criteria.

- Distributes signals more evenly.

- Greater flexibility for applicants
- Distribute signals more evenly

### Cons

- Insufficient for accurately representing all applicant preferences.

- Tempting to use as a threshold.
- Value of the signal may be diluted.

- Tempting to use as a threshold.
- Explanation more challenging.

### Example

- General Surgery (5)
- Internal Medicine (7)

- Ortho (30)
- ENT (25)

- OBGYN (3 Gold, 15 Silver)
- Derm (3 Gold, 25 Silver)

# Neurological Surgery: Program Sample & Inclusion Criteria

	N of Programs for Program Signals
Total programs	116
Total programs participating in program signaling	109
Did not meet inclusion rule equal to or larger than 7:1; Did not provide PGY1 info in GME track; Did not provide interview offer data by December 29, 2023	22
N Programs with fewer than 10 Program Signals	0
<b>Total analytic sample</b>	<b>87</b>
<b>Total % of programs participating in program signaling</b>	<b>80%</b>
<b>Total % of all Neurological Surgery programs in 2024 ERAS cycle</b>	<b>75%</b>

# Neurological Surgery: Interview Rates by Program Signal Status

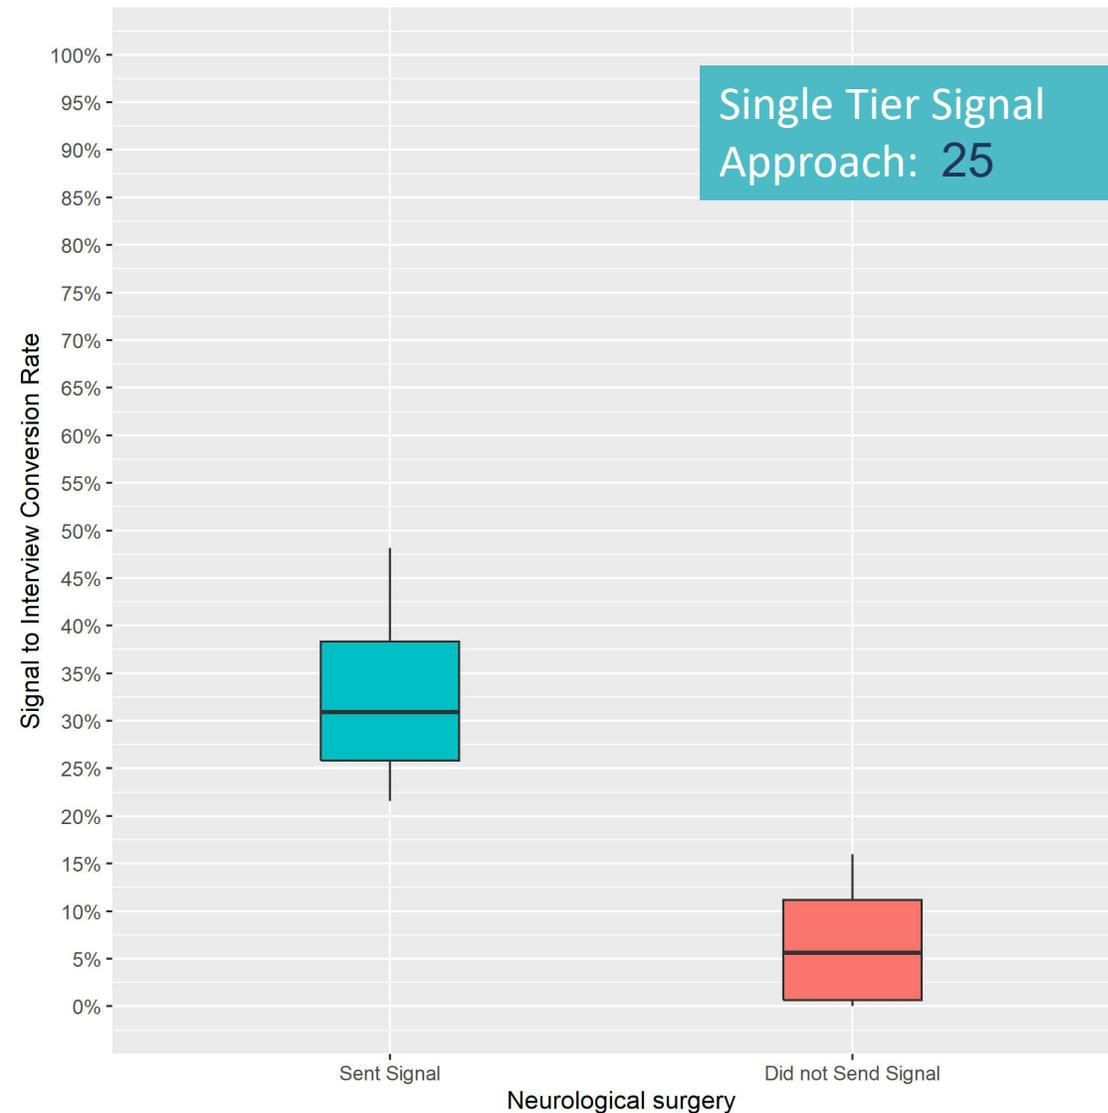

Number of Neurosurgery programs plotted:  
116 (2024 ERAS cycle).

Applicants who sent a signal:

- Median of interview offers: 31%.
- 10th percentile: 22%.
- 90th percentile: 48%.

Applicants who did not send a signal:

- Median of interview offers: 6%.
- 10th percentile: <1%.
- 90th percentile: 14%.

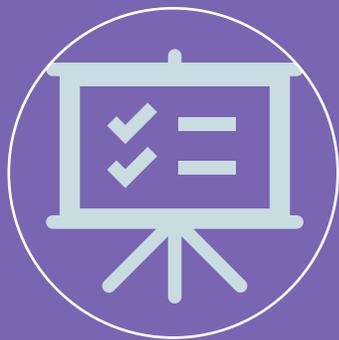

# Guidance

## Applicants

- Signal your TRUE preferences
- Signal your home and rotation institutions if they are your TRUE preference
- Don't send "love letter" follow-up emails

## Programs

- Be honest on your website about how you're using signals
- **Advise your home and rotating students to SIGNAL**
- Don't overweight signals in your review process
- Look for corroborating information in the application to support an applicants' preference
- Don't use signals after interview day

## Program Signals

### Do:

- ✓ Use signals when deciding whom to invite to interview *only*.
- ✓ Consider signals as a “plus factor,” not a screening tool.

### Do not:

- Overweigh signals in your selection process.
- Assume applicants who do not signal your program are not genuinely interested in your program.

# Ensuring Fair Practices: Geographic Preferences and Program Signals

## Prohibited Actions with Geographic Preference Information:

- Asking applicants their geographic preference when they did not provide a response.
- Asking applicants if they indicated a preference for another geographic division.
- Asking applicants their division preferences when they are not indicated.
- Using geographic preference information when creating or finalizing the program's rank order list.

## Prohibited Actions with Program Signals:

- Disclosing the identity of an applicant who has sent your program a signal.
- Asking applicants to which programs they sent signals.
- Asking applicants why they chose not to signal your program.
- Using program signal information when creating or finalizing the program's rank order list.

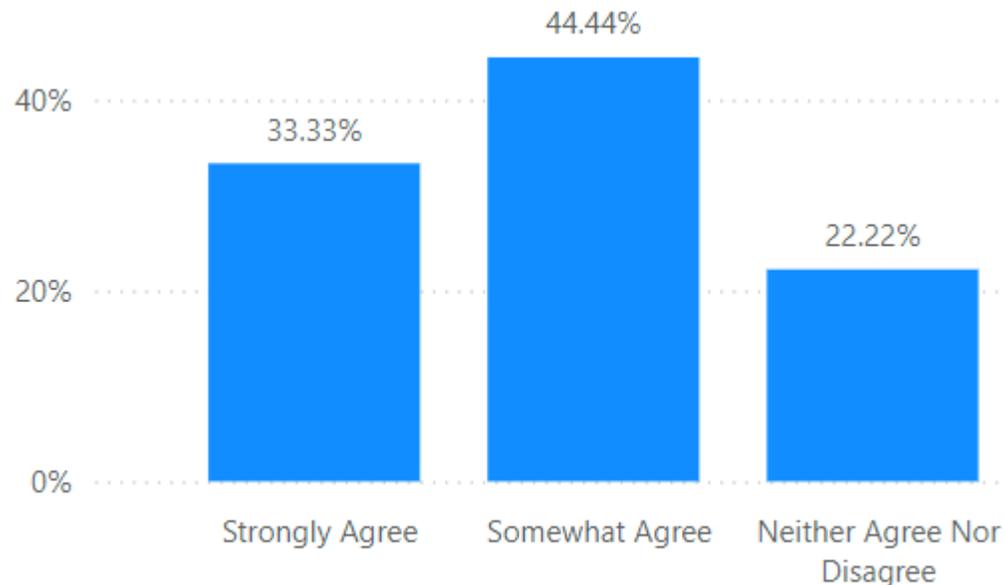

# Neurosurgery PD Survey Responses

## How did you use program signals?

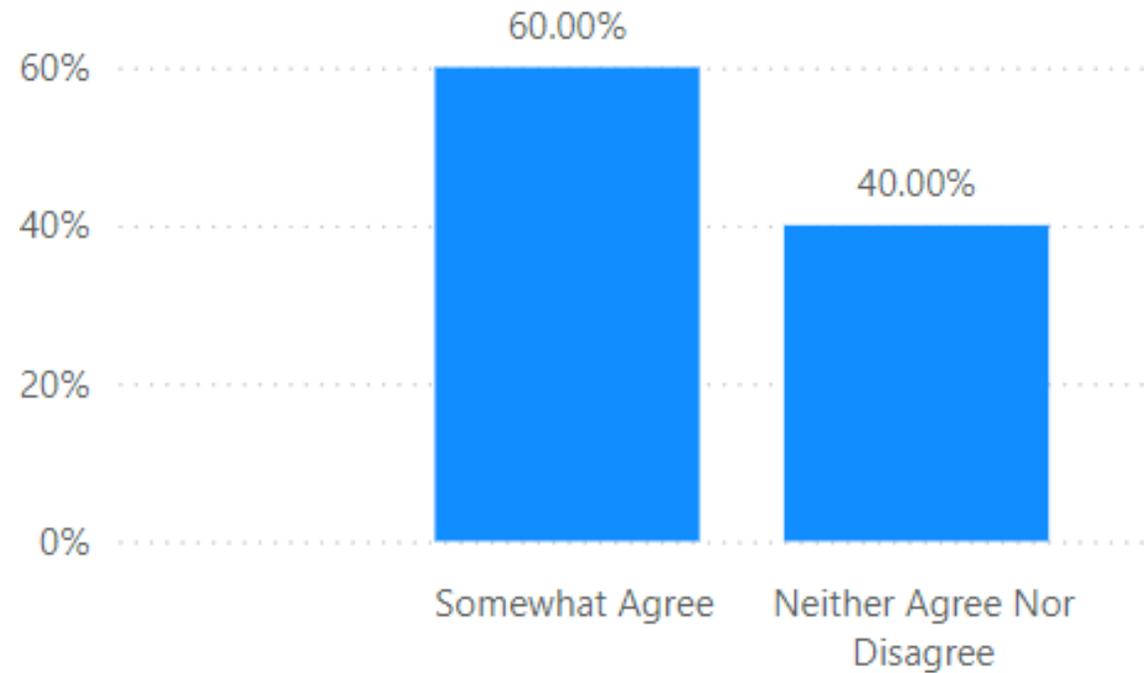

# Neurosurgery PD Survey Responses

**Program signals helped me identify applicants to interview whom I would have otherwise overlooked.**

# PD Survey Responses

**Based on a review of their application, applicants who signaled my program were better aligned than those who did not.**

# Neurosurgery PD Program Survey Responses

## Geographic & Setting Preferences

- **Over 46%** agreed that geographic preference information helped them identify applicants they would have otherwise overlooked
- **Nearly 71%** agreed that geographic preference information helped them more easily identify applicants who have geographic ties to their location compared to old location data
- **Over 15%** found setting preferences (rural/urban) helped identify applicants they would have overlooked or had ties to the program's location.

# Applicant Feedback

The most important factors impacting where applicants applied

Geographic location of program	61.4%
Close to family/friends	56.6%
Alignment of program strengths with my career interests	52.6%
Perceived good fit	41.9%
Perceived chance of interview offer	34.6%

## Experiences

- Nearly 80% of applicants agreed that experience types allowed them to showcase activities that were important to them. **A 12% increase** over last year's survey.
- 63% of applicants agreed that “focus areas” allows them to showcase what is important to them. A 3% increase over last year's survey.

# Applicant Feedback

## Program signals

- 85% of applicants agreed that program signals reflected their true preferences at the time of application. A **5% increase** over last year's survey.
- 67% of applicants agreed that program signals may help them be noticed by programs where they had the most interest. A 3% increase from last year's survey.

## Geographic preferences

- Nearly 85% of applicants agreed that their geographic preferences section reflected their true preferences at the time of application. This is a **5% increase** compared to last year's survey data.

# Neurological Surgery Program Signal Model for ERAS 2024- 2025 Season

# AAMC Fee Assistance Adding ERAS Support

**Beginning with the 2025 ERAS season, the AAMC Fee Assistance Program will expand to include ERAS applications.**

- Residency applicants who were approved for AAMC Fee Assistance prior to entering medical school will receive the expanded benefit.
- Benefit will be **60% discount off first 50 applications.**
- We will continue to evolve with community input and feedback.

# New Residency Fee Structure

- The AAMC recently announced a new ERAS fee structure for residency applicants.
- Two years of research and collaboration with the medical education community, learners, and financial aid experts guided the work in determining the new structure.
- The fees apply to each specialty to which an applicant applies.
- Significant impact – most applicants will see discounts up to 36%.

Number of Applications	Cost Per Application
1-30	\$11
31 or more	\$30

# Continued Evolution of the MyERAS<sup>®</sup> Application

**Align with  
Present Day  
Program  
Needs**

**Expand  
Mission-  
Driven  
Information**

**Minimize  
Open-Text  
Fields**

**Promote  
Fairness  
& Equity**

# Upcoming ERAS Enhancements

## Application Changes

- Overall adjustments to streamline the application, minimize open text fields, and fit program-mission needs.
  - Awards and honors, language proficiency, licensure questions, etc.
- Reducing Hometown entries from 5 to 3.
- New self-identified race and ethnicity options.
- Publication formatting from APA to AMA.

## System Changes

- ERAS PDWS Interview Scheduler and DIO Analytics sunsetting in June.
- Integration with Thalamus
  - ERAS Program Management (EPM) opt-in process.
  - Ease of navigation between PDWS and Thalamus Core/Cortex.
  - AAMC account sign in for Thalamus.
  - Application API between PDWS and Thalamus.

# Hobbies and Interests

## Observation

- Hobbies and interests help applicants express their humanity and help programs see additional dimensions to an applicant.
- Feedback that hobbies and interests should be separate from selected experiences.

## Prior State

Experience ×

First, identify and describe **up to 10 experiences** that communicate who you are, what you are passionate about, and what is most important to you.  
After saving, then identify and describe **up to 3 experiences** that you found the most meaningful.

\* Indicates required field.

Organization\*

Experience Type\*  
Other extracurricular activity, club, hobby

Position Title\*

I am currently working in this role.

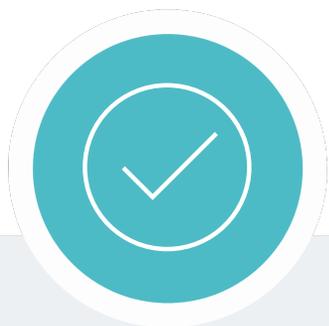

Start Date\*

End Date\*

## Modification

- Removing hobby from Experience Type option and renaming it as “Other extracurricular activities/clubs”.
- Reinstating a Hobbies & Interests section with an open text field of 300 characters.

# Publications

- Literature Review.
- Historical Analysis.
- Focus Groups.
- Feedback at LSL and other constituent meetings.

- Varying views on research types & importance.
- Emphasis on quality.
- Access to research opportunities varies widely.

- No significant changes in the 2025 ERAS season.

May 2024:  
Thematic  
changes for  
2026 ERAS  
Finalized.

# AAMC Thalamus Collaboration Offerings

What's included complimentary			Available for an additional fee <sup>*†‡</sup>	
 <p><b>thalamus</b> core</p>	 <p><b>thalamus</b> itinerary wizard™</p>	 <p><b>Cerebellum</b><sup>™</sup> powered by thalamus</p>	 <p><b>cortex</b> powered by thalamus</p>	 <p><b>thalamus</b> video</p>
Interview scheduling and management	Itinerary building	Data and analytics dashboard	Tech-assisted holistic application review	Video interview platform
* Institutional discounts are available.				

**ERAS/PDWS is not going away – applications will still come into PDWS**

**ERAS Scheduler and DIO Analytics no longer available for the 2024-2025 Season**

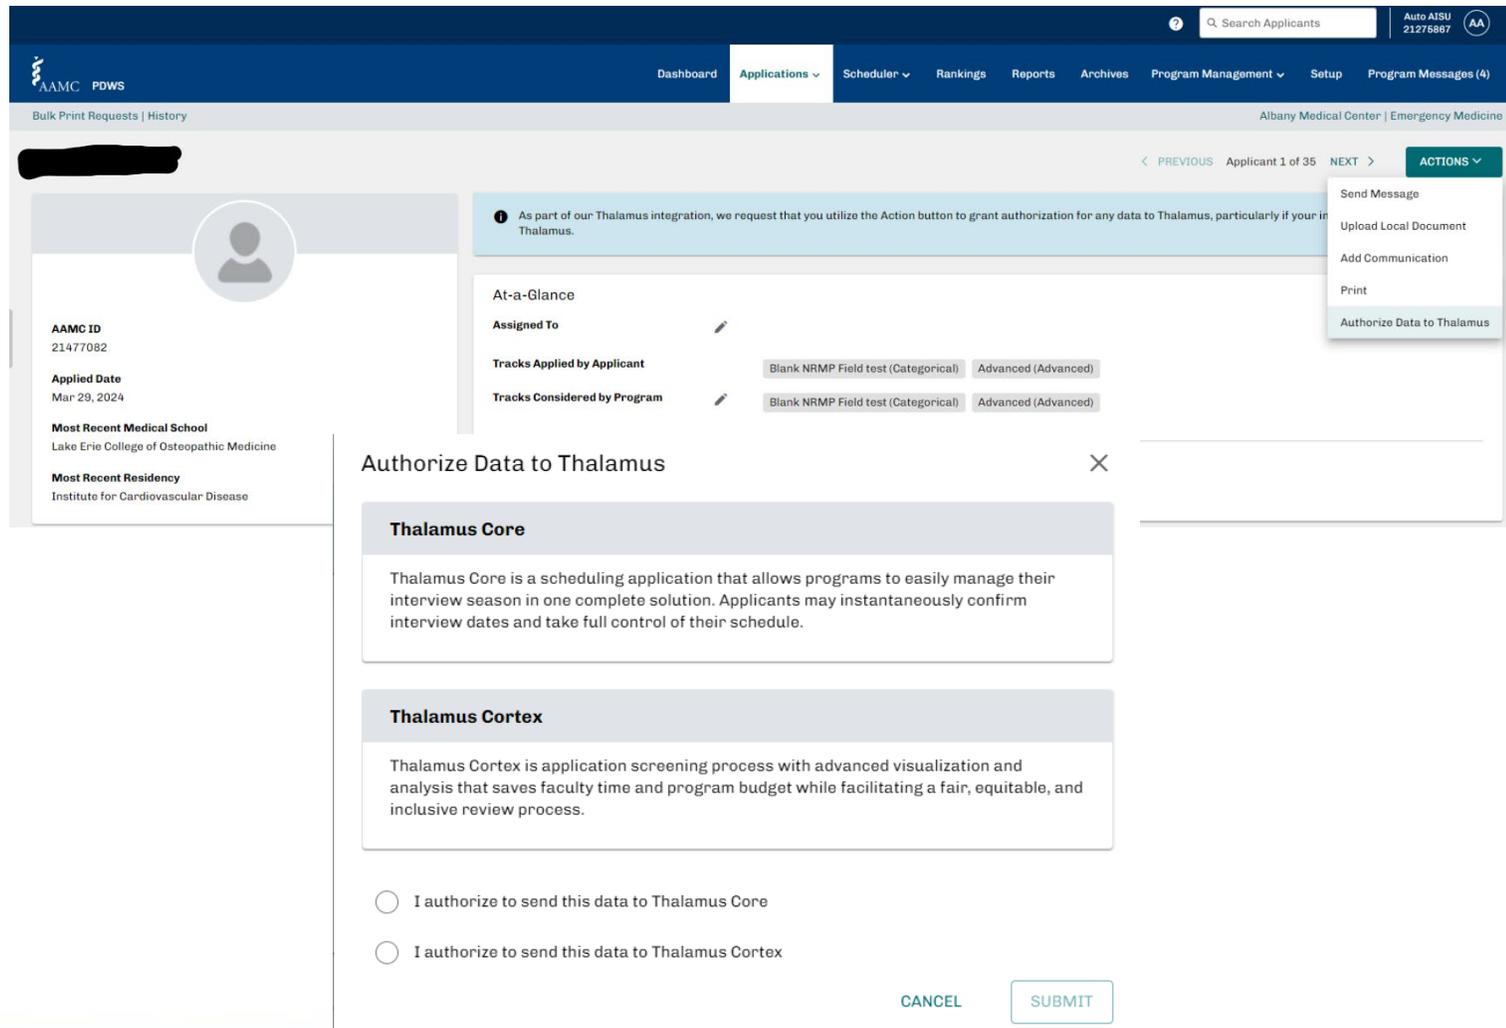

# Option 1: Sending Applications from the PDWS to Thalamus Individually

**Individually send applicant data** from the PDWS to Thalamus as you are reviewing individual applications.

You may authorize data to **Thalamus Core and/or Cortex.**

Application data and documents **update automatically throughout season.**

Note: Screenshots not final. Please do not share.

The screenshot displays the AAMC PDWS interface. At the top, there is a navigation bar with 'Dashboard', 'Applications', 'Scheduler', 'Rankings', 'Reports', 'Archives', 'Program Management', 'Setup', and 'Program Messages (4)'. A search bar for 'Search Applicants' and a user profile for 'Auto AISU 21276887' are also visible. The main content area shows an applicant's profile with a redacted name and a profile picture. The profile details include: AAMC ID: 21477082, Applied Date: Mar 29, 2024, Most Recent Medical School: Lake Erie College of Osteopathic Medicine, and Most Recent Residency: Institute for Cardiovascular Disease. To the right, there is an 'At-a-Glance' section with 'Assigned To' and 'Tracks Applied by Applicant' (Blank NRMP Field test (Categorical), Advanced (Advanced)). A modal dialog box titled 'Authorize Data to Thalamus' is open, showing two options: 'Thalamus Core' and 'Thalamus Cortex'. The 'Thalamus Core' section describes it as a scheduling application, and the 'Thalamus Cortex' section describes it as an application screening process. At the bottom of the dialog, there are two radio buttons: 'I authorize to send this data to Thalamus Core' and 'I authorize to send this data to Thalamus Cortex'. 'CANCEL' and 'SUBMIT' buttons are located at the bottom right of the dialog.

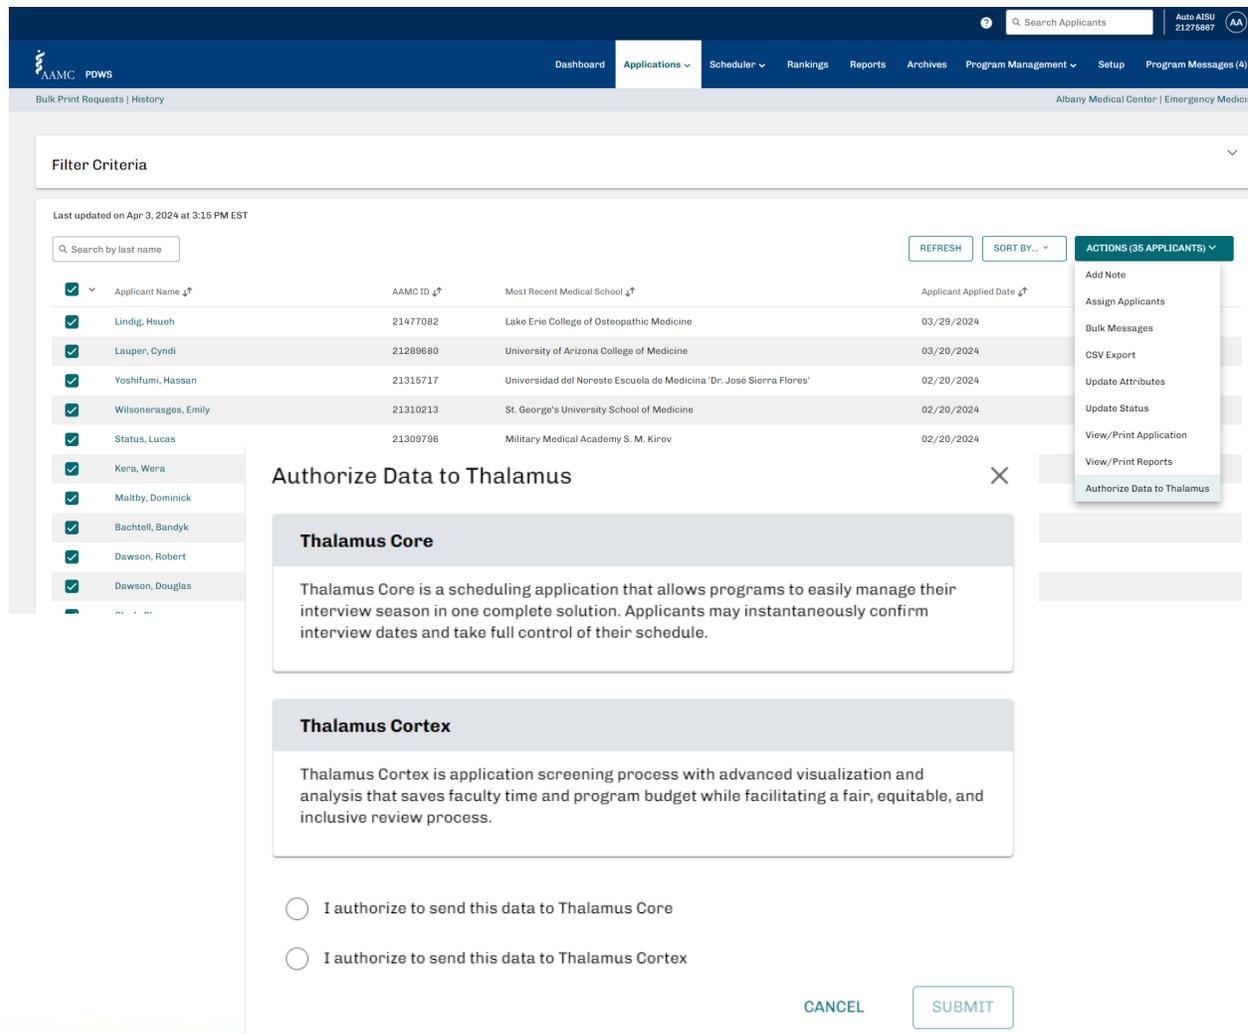

# Option 2: Sending Applications from the PDWS to Thalamus in Bulk

Send multiple applicants' data at a time from the PDWS to Thalamus in the current results page.

You may authorize data to **Thalamus Core** and/or **Cortex**.

Application data and documents **update automatically** throughout season.

Note: Screenshots not final. Please do not share.

The screenshot shows the AAMC PDWS interface. At the top, there's a navigation bar with 'Dashboard', 'Applications', 'Scheduler', 'Rankings', 'Reports', 'Archives', 'Program Management', 'Setup', and 'Program Messages (4)'. Below this is a 'Filter Criteria' section with a search bar and a table of applicants. The table has columns for 'Applicant Name', 'AAMC ID', 'Most Recent Medical School', and 'Applicant Applied Date'. There are 35 applicants listed, with the first five visible in the table. An 'ACTIONS (35 APPLICANTS)' dropdown menu is open, showing options like 'Add Note', 'Assign Applicants', 'Bulk Messages', 'CSV Export', 'Update Attributes', 'Update Status', 'View/Print Application', 'View/Print Reports', and 'Authorize Data to Thalamus'. The 'Authorize Data to Thalamus' dialog box is open, showing two options: 'Thalamus Core' and 'Thalamus Cortex'. The 'Thalamus Core' option is selected, and the 'I authorize to send this data to Thalamus Core' radio button is checked. There are 'CANCEL' and 'SUBMIT' buttons at the bottom of the dialog.

Applicant Name	AAMC ID	Most Recent Medical School	Applicant Applied Date
Lindig, Haueh	21477082	Lake Erie College of Osteopathic Medicine	03/29/2024
Lauper, Cyndi	21289880	University of Arizona College of Medicine	03/20/2024
Yoshifumi, Hassan	21315717	Universidad del Noreste Escuela de Medicina 'Dr. José Sierra Flores'	02/20/2024
Wilsonerasges, Emily	21310213	St. George's University School of Medicine	02/20/2024
Status, Lucas	21309796	Military Medical Academy S. M. Kirov	02/20/2024
